Praveen R

Design Workshop:

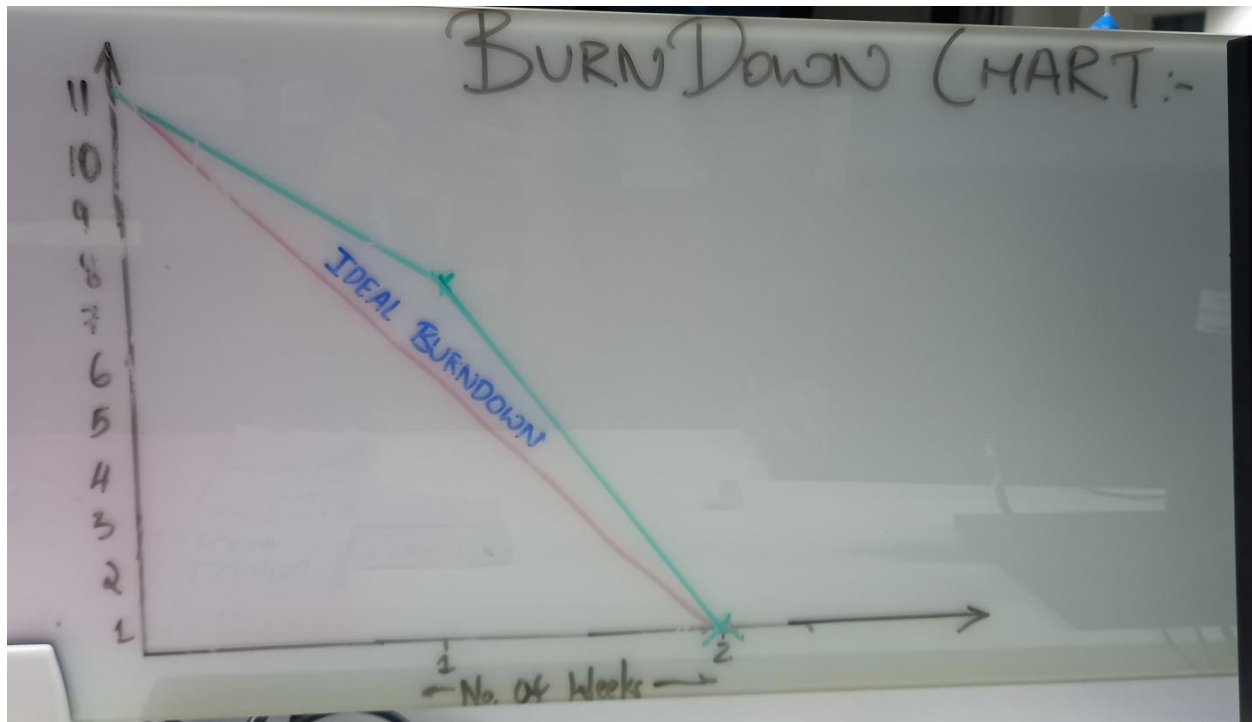

Expected Design discussed by the team for the projects.

Process Overflow Diagram:

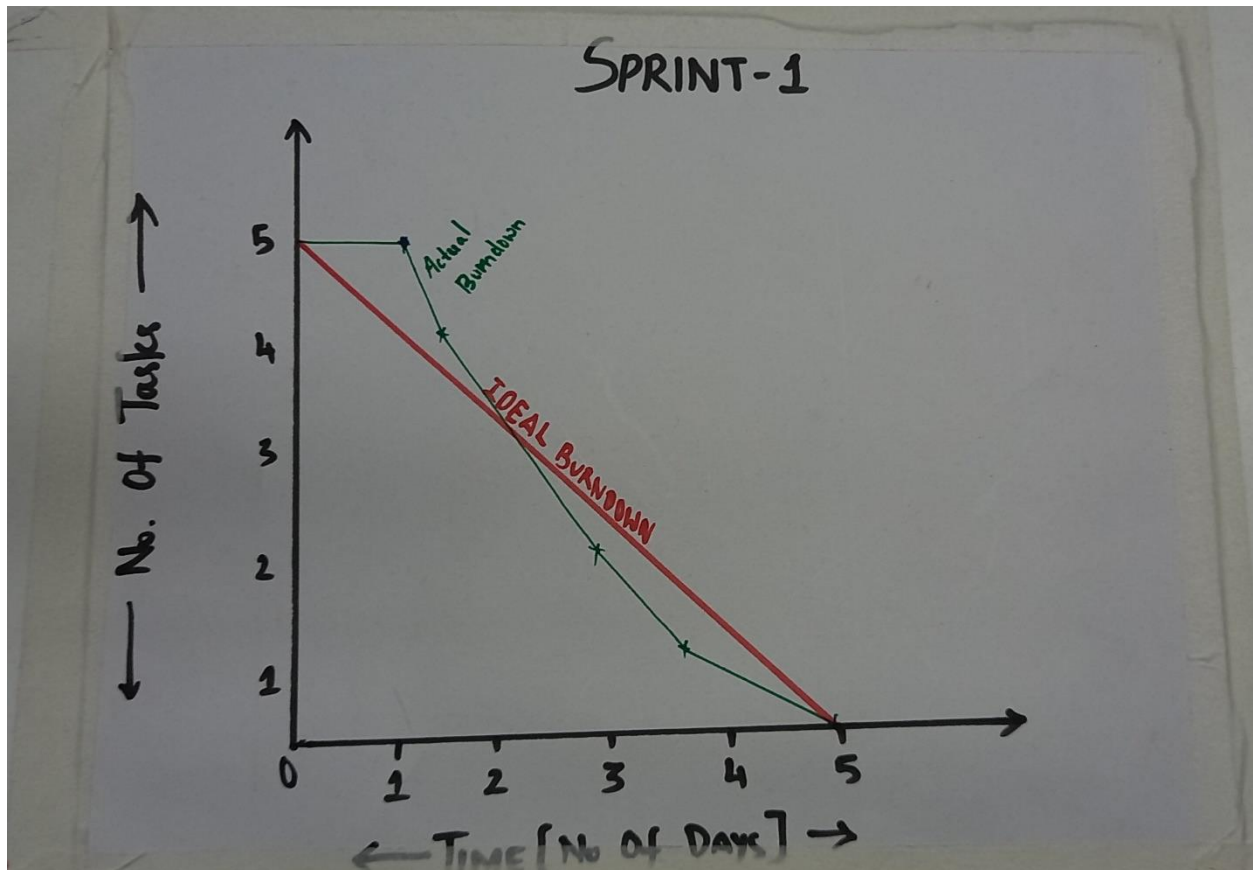

Burndown Chart:

- We planned this project for 2 weeks i.e. (15 days) with 11 tasks.
- There were totally 2 sprints as shown below, sprints 1 had 5 days with 5 tasks to do and the sprint 2 had 5 days with 6 tasks.
- The actual burndown how it went on is captured and pasted here. It went according to that successfully and by end of 15th day our project was ready.

Sprint 1:

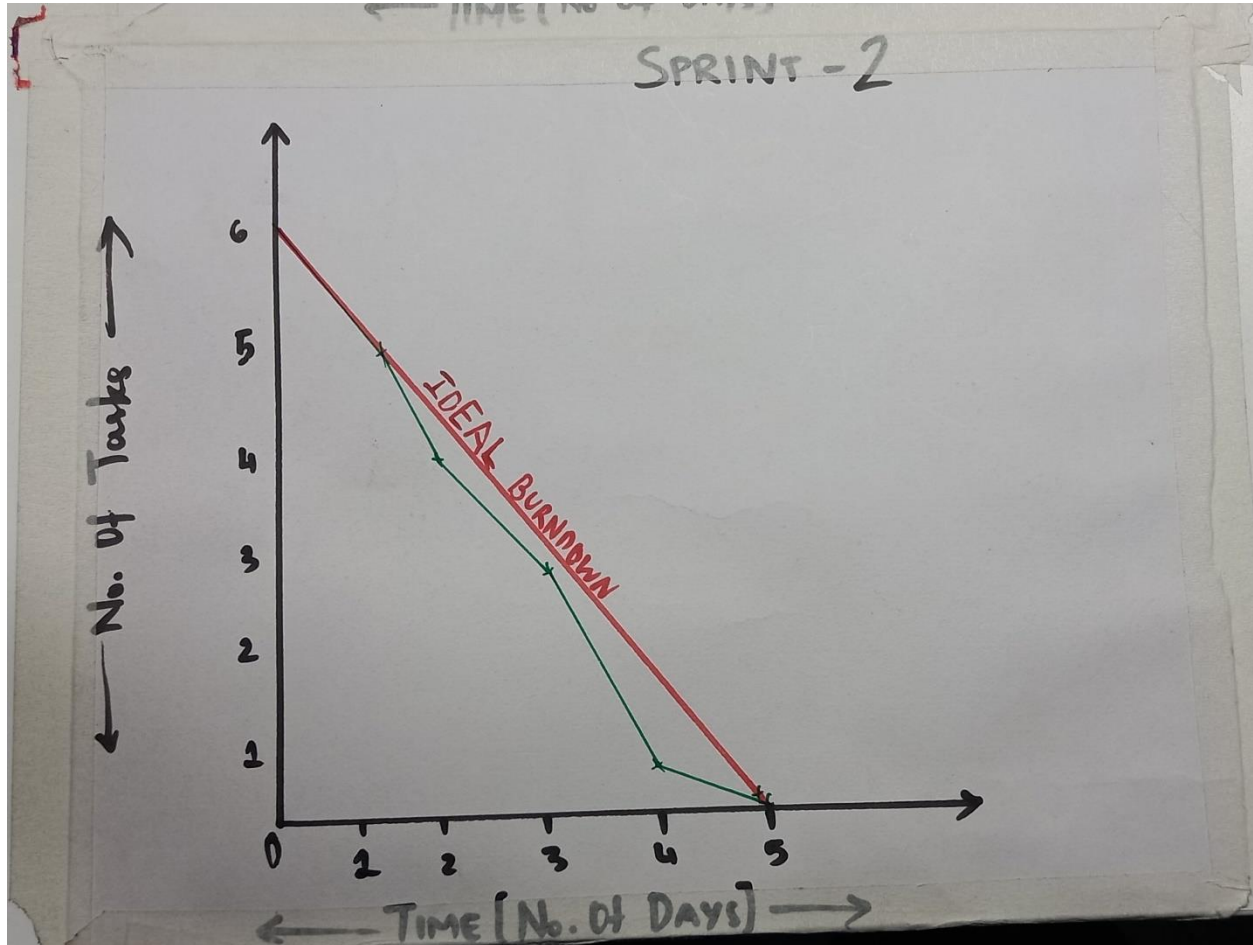

No. of days – 5

No. of Tasks – 5

Activities – Done with Login, Register, Editprofile, View profile, Create Message

Sprint 2:

No. of days – 5

No. of Tasks – 6

Activities – Done with Message Board, Create Task, Task Board, Add Comment, User Interface, Dashboard.

Functionalities:

User Registration/Login of the registered user. Updating and View Profile : Praveen

Message Board with functionalities Create message, delete message and edit message with search operation -Niveditha

Comments with functionalities Create comment ,Edit comment and delete Comment with comments count in task board -Bhoomika

TaskBoard with functionalities Create task, Update Task and Delete Task with task board details-Ayushi

Dashboard and Integrating comments with taskboard and load more - All the members

Retrospection:

What went well during the sprint?

- Coordination within the team.
- Equal distributions of task to each member.

What could have been better?

- Better Understanding of requirements faster.

Things to try:

- Working on responsive area of the project UI
